Alan V. Rogers to Lead Command Information as CEO

Seasoned executive brings business and government experience to IT services company

Alexandria, VA, August 31, 2009 – Command Information is pleased to announce Alan V. Rogers as its Chief Executive Officer. Rogers will lead Command Information in its mission to bring state-of-the-art net-centric information services and solutions to public sector organizations.

“Al is a highly respected executive who has earned a strong reputation leading organizations, programs, and people to success,” said Peter DiGiammarino, who served as interim CEO for Command Information and now chairs its Board of Directors. “His track record as a business leader and his service in the United States Air Force make him the ideal candidate to lead our cutting-edge organization.”

Rogers brings extensive executive business experience including serving as Executive Vice President at CACI International, Inc. and Senior Vice President and General Manager of the Federal Defense Group at American Management Systems. He also completed a career in the United States Air Force, retiring at the rank of Major General. His service included the Joint Staff, NATO, Air Staff and numerous operational commands. He is a graduate of the Harvard Business School and the United States Air Force Academy. He resides in Arlington, Virginia, with his wife, Linda.

Regarding his new role, Rogers stated, “I am excited by the opportunity to lead Command and look forward to applying my diverse experience to enhancing the possibilities for enterprise transportation solutions, cyber security, and IT services for the Department of Defense and the Federal Civilian Agencies. I am delighted to be joining the Command team and committed to ensuring that every organization we serve derives the greatest possible value from the services and products we deliver.”

About Command Information Alexandria, VA-based Command Information, a trusted partner to global organizations and federal agencies for over 17 years, is a leading provider of net-centric information services and solutions for large-scale and complex networks and systems. Specializing in next-generation Internet Protocol (IPv6), Command Information provides advanced cyber security solutions, information assurance, and network engineering services. Command’s CMMI level 3 software development and systems engineering, coupled with deep transportation and logistics domain expertise, supports mission critical enterprise systems with global reach. Command has demonstrated success in solving today’s challenges using the technologies of tomorrow. Command Information is backed by investments from three global private equity and venture funding firms - The Carlyle Group, Novak Biddle Venture Partners, and Paladin Capital Group.
